

## Earth Love Month

### Day 29: Give the gift of goodness

The changes in our daily habits can go a long way in lessening our impact on the environment and reversing some of the damage already done. However, individual efforts are not enough. Some causes require professional intervention.

Did you know that 663 million people in the world lack access to clean water? Women in Africa spend 40 billion hours a year walking for water and many kids in poor rural areas miss school because because fetching water for the family requires a lot of time.

[Charity: Water](#) has funded and built over 19,000 water well projects in 24 countries, bringing clean water to those who otherwise would be sick and dying from the lack thereof.

Please consider making a donation to [Charity: Water](#) or another environmental non-profit in the spirit of Earth Love Month.

Thank you!
